

Master project for Master of Science Program “International Master of Environmental Science” (IMES) at the University of Cologne**GESA HEINICHEN****Working title: Land use strategies, land rights and land-use changes in a northern Kenyan wetland (Ewaso Narok, Laikipia)**

The Master of Science Program “International Master of Environmental Science” (IMES) at the University of Cologne provides the conceptual framework for the abovementioned master thesis.

A two month fieldtrip will focus on the different land use strategies and potential dependence on land rights in the area of the Ewaso Narok Swamp in Laikipia District, Kenya.

It is part of the GlobE-Project „Wetlands in East Africa - reconciling future food production with environment protection“
